

Local Profiles Mockup Dashboard

SY 2023- 2024, FFY 2022

Prepared by Keisha Bolaji

New Jersey Department of Education SY 2023 -2024 Local Profiles Dashboard

Overview Page

About the Local Special Education Profile

In fulfillment of the requirements of the Individuals with Disabilities Education Act (IDEA 2004), under section 616(b)(2)(C)(ii)(1), each state must report annually to the public on the performance of each local school district in relation to state targets reported in the federally required special education State Performance Plan (SPP) and Annual Performance Report (APR). This is the tenth year in which the Department has issued public reports. The reports include local data and state targets for the SPP indicators required for public reporting for 2020-2021 by the United States Office of Special Education Programs (USOSEP).

The Local Special Education Profile reports include local data and state targets for both compliance and performance SPP indicators. Some SPP targets for indicators related to compliance with IDEA regulations were set by the USOSEP. Targets for indicators related to student performance or outcomes were set with input from a group of stakeholders who are integrally involved in providing services to students and adults with disabilities in our state as well as parents.

These reports should be used by your district leadership to compare the district's data to state targets and data from previous years and identify changes. Key metrics, such as placement in the least restrictive environment, disproportionality and post-secondary outcomes may be used to highlight successful services and identify areas for improvement planning.

What has changed this year?

- Transforming the static, multi-page pdf report into a dynamic data dashboard;
- Organizing indicators by topic, to highlight their applicability and meaning for special education services and programs under IDEA;
- Including explanatory text and graphics to facilitate interpretation; and
- Ensuring consistency in terminology between the Local Profiles and the School Performance Reports.

Using the Local Special Education Profiles

This is considered the "Overview" page of the profile, which is also the first tab in the horizontal navigation bar at the top of the page. On this page, select the county from the dropdown menu and then select the Local Education Agency (LEA) or school district. The remaining tabs on the top navigation bar provide more detailed information for each accountability indicator, including outcomes and annual targets for each student group. Simply click on a tab to view how the LEA performed on the indicator. For each indicator where enough data was available to result in valid and reliable insight, bar graphs are provided to display the LEA's performance. Additionally, there is a comparison between local performance and the state target (the +/- difference).

Contact Information

Any questions related to the Local Special Education Profiles may be directed to the Office of Special Education at OSEdata@doe.nj.gov.
